Information on King Alfred Trust nigel.jones@ kingalfredtrust.co.uk

You may not realise it and we hope this isn't your School, but a large percentage of schools have fallen victim to IT companies who are exploiting their position and lack of knowledge. Therefore, outdated solutions are being implemented through outdated technology at an extortionate cost.

For Example: Capita, one of the UK's biggest outsourcing firms has already been reported to the Office of Fair Trading for billing educational establishments £75m too much, charging premiums in advance for non-existent tech upgrades schools weren't benefitting from.

The King Alfred Trust became such a victim and our Managing Director, Nigel Jones saw this first hand. As the Chair of the Trust, they called on his support and it was at this moment that he discovered just how these opportunistic IT companies take advantage of such situations.

Nigel stated *"It was clear the IT Companies who tendered for the business were offering old technology, poor solutions at high prices and proposals were designed to confuse and hide the real costs. In addition, their responses during the scrutiny process were poor, superficial and even flippant."*

Nigel spent a large amount of time conversing with other Trustees, Chairs and Accountancy Practices and Auditors and it was clear this was an endemic problem in the Education Sector.

A team of IT experts was assembled to design an Enterprise level, secure hosted solution for the King Alfred Trust which was duly delivered and saved over £8k per annum against any other of the bidders' proposals.

As a result, CloudHappi was setup to deliver simple, modern and effective IT solutions to Trusts and Schools enabling them to make better informed decisions on IT solutions and save money.

Understand where your IT is and whether you should be getting a lot more for less and it won't cost you a penny!

Andy Brown, one of the IT Consultants, from AnSu Consulting, now offers free, independent IT advice for schools, including audits, designing tender processes and documents as well as assisting School Management Teams in making informed decisions on the most cost effective solutions that deliver what they need.
